Reorder

The black spots seen at the beginning of  
the inner zone are the neutral zones of  
the positive and negative. In this  
instance the Negative is outward and  
of inward as usual.

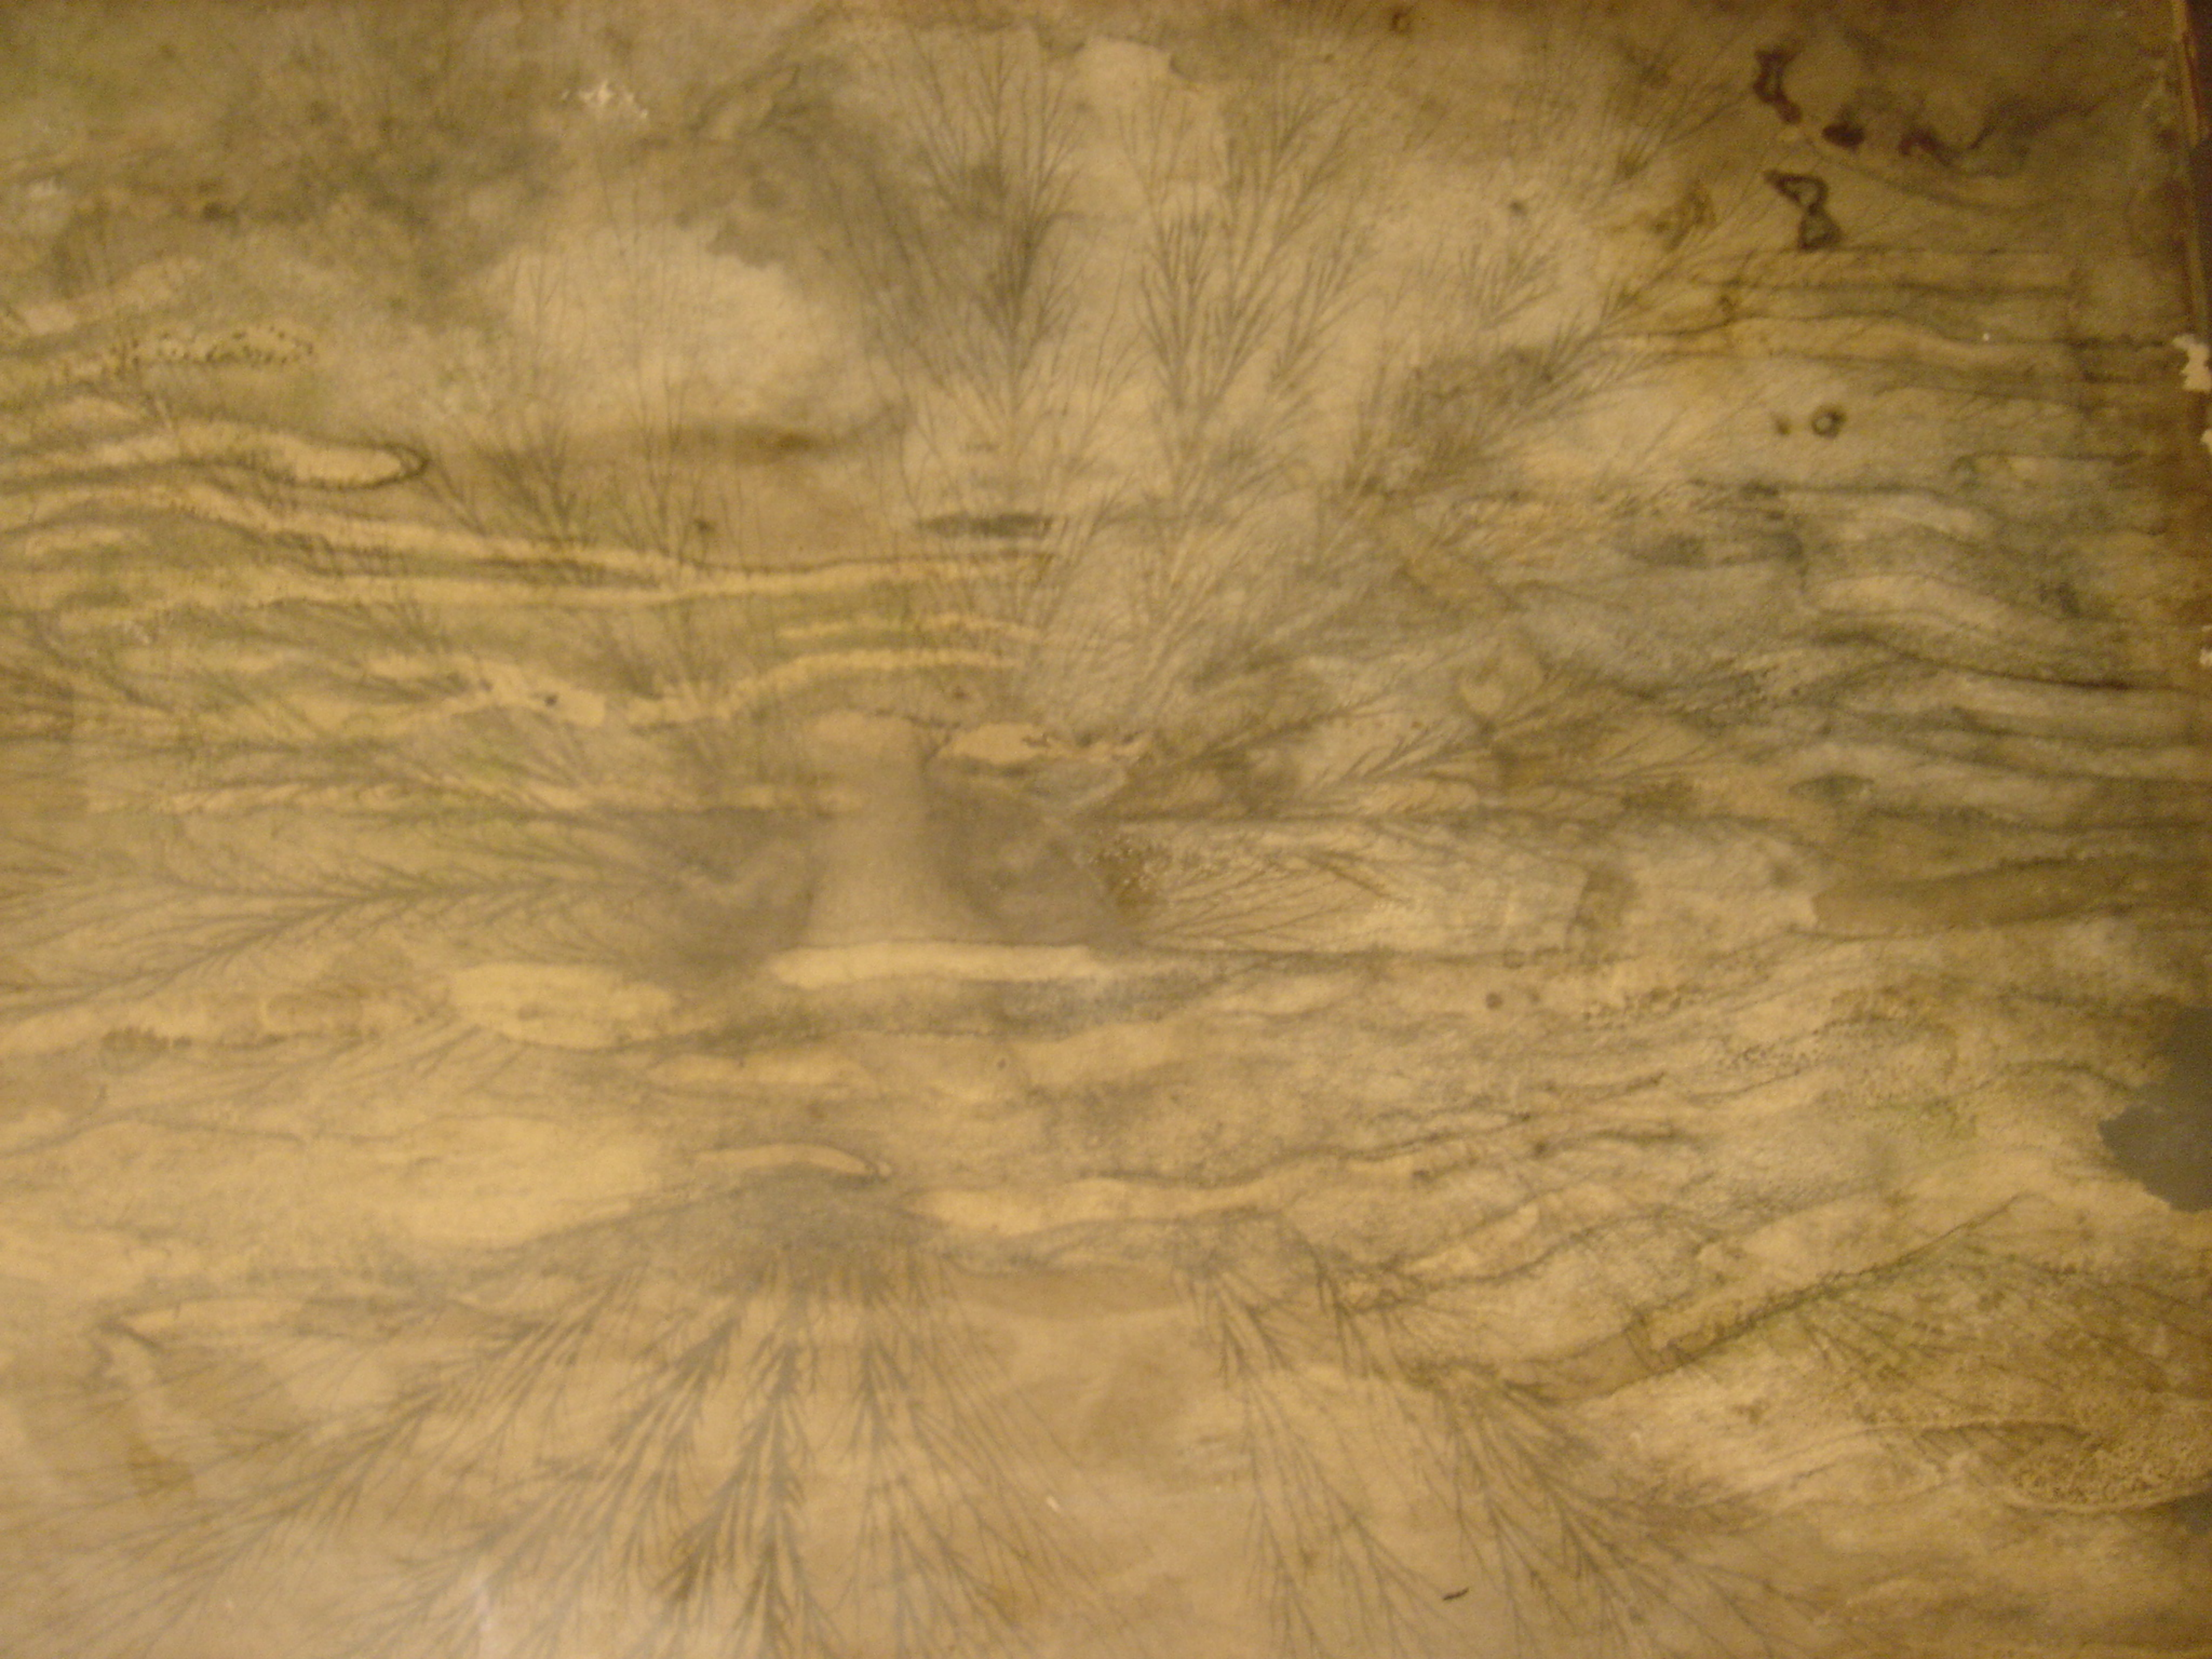

Primer: Pure Antiquarian

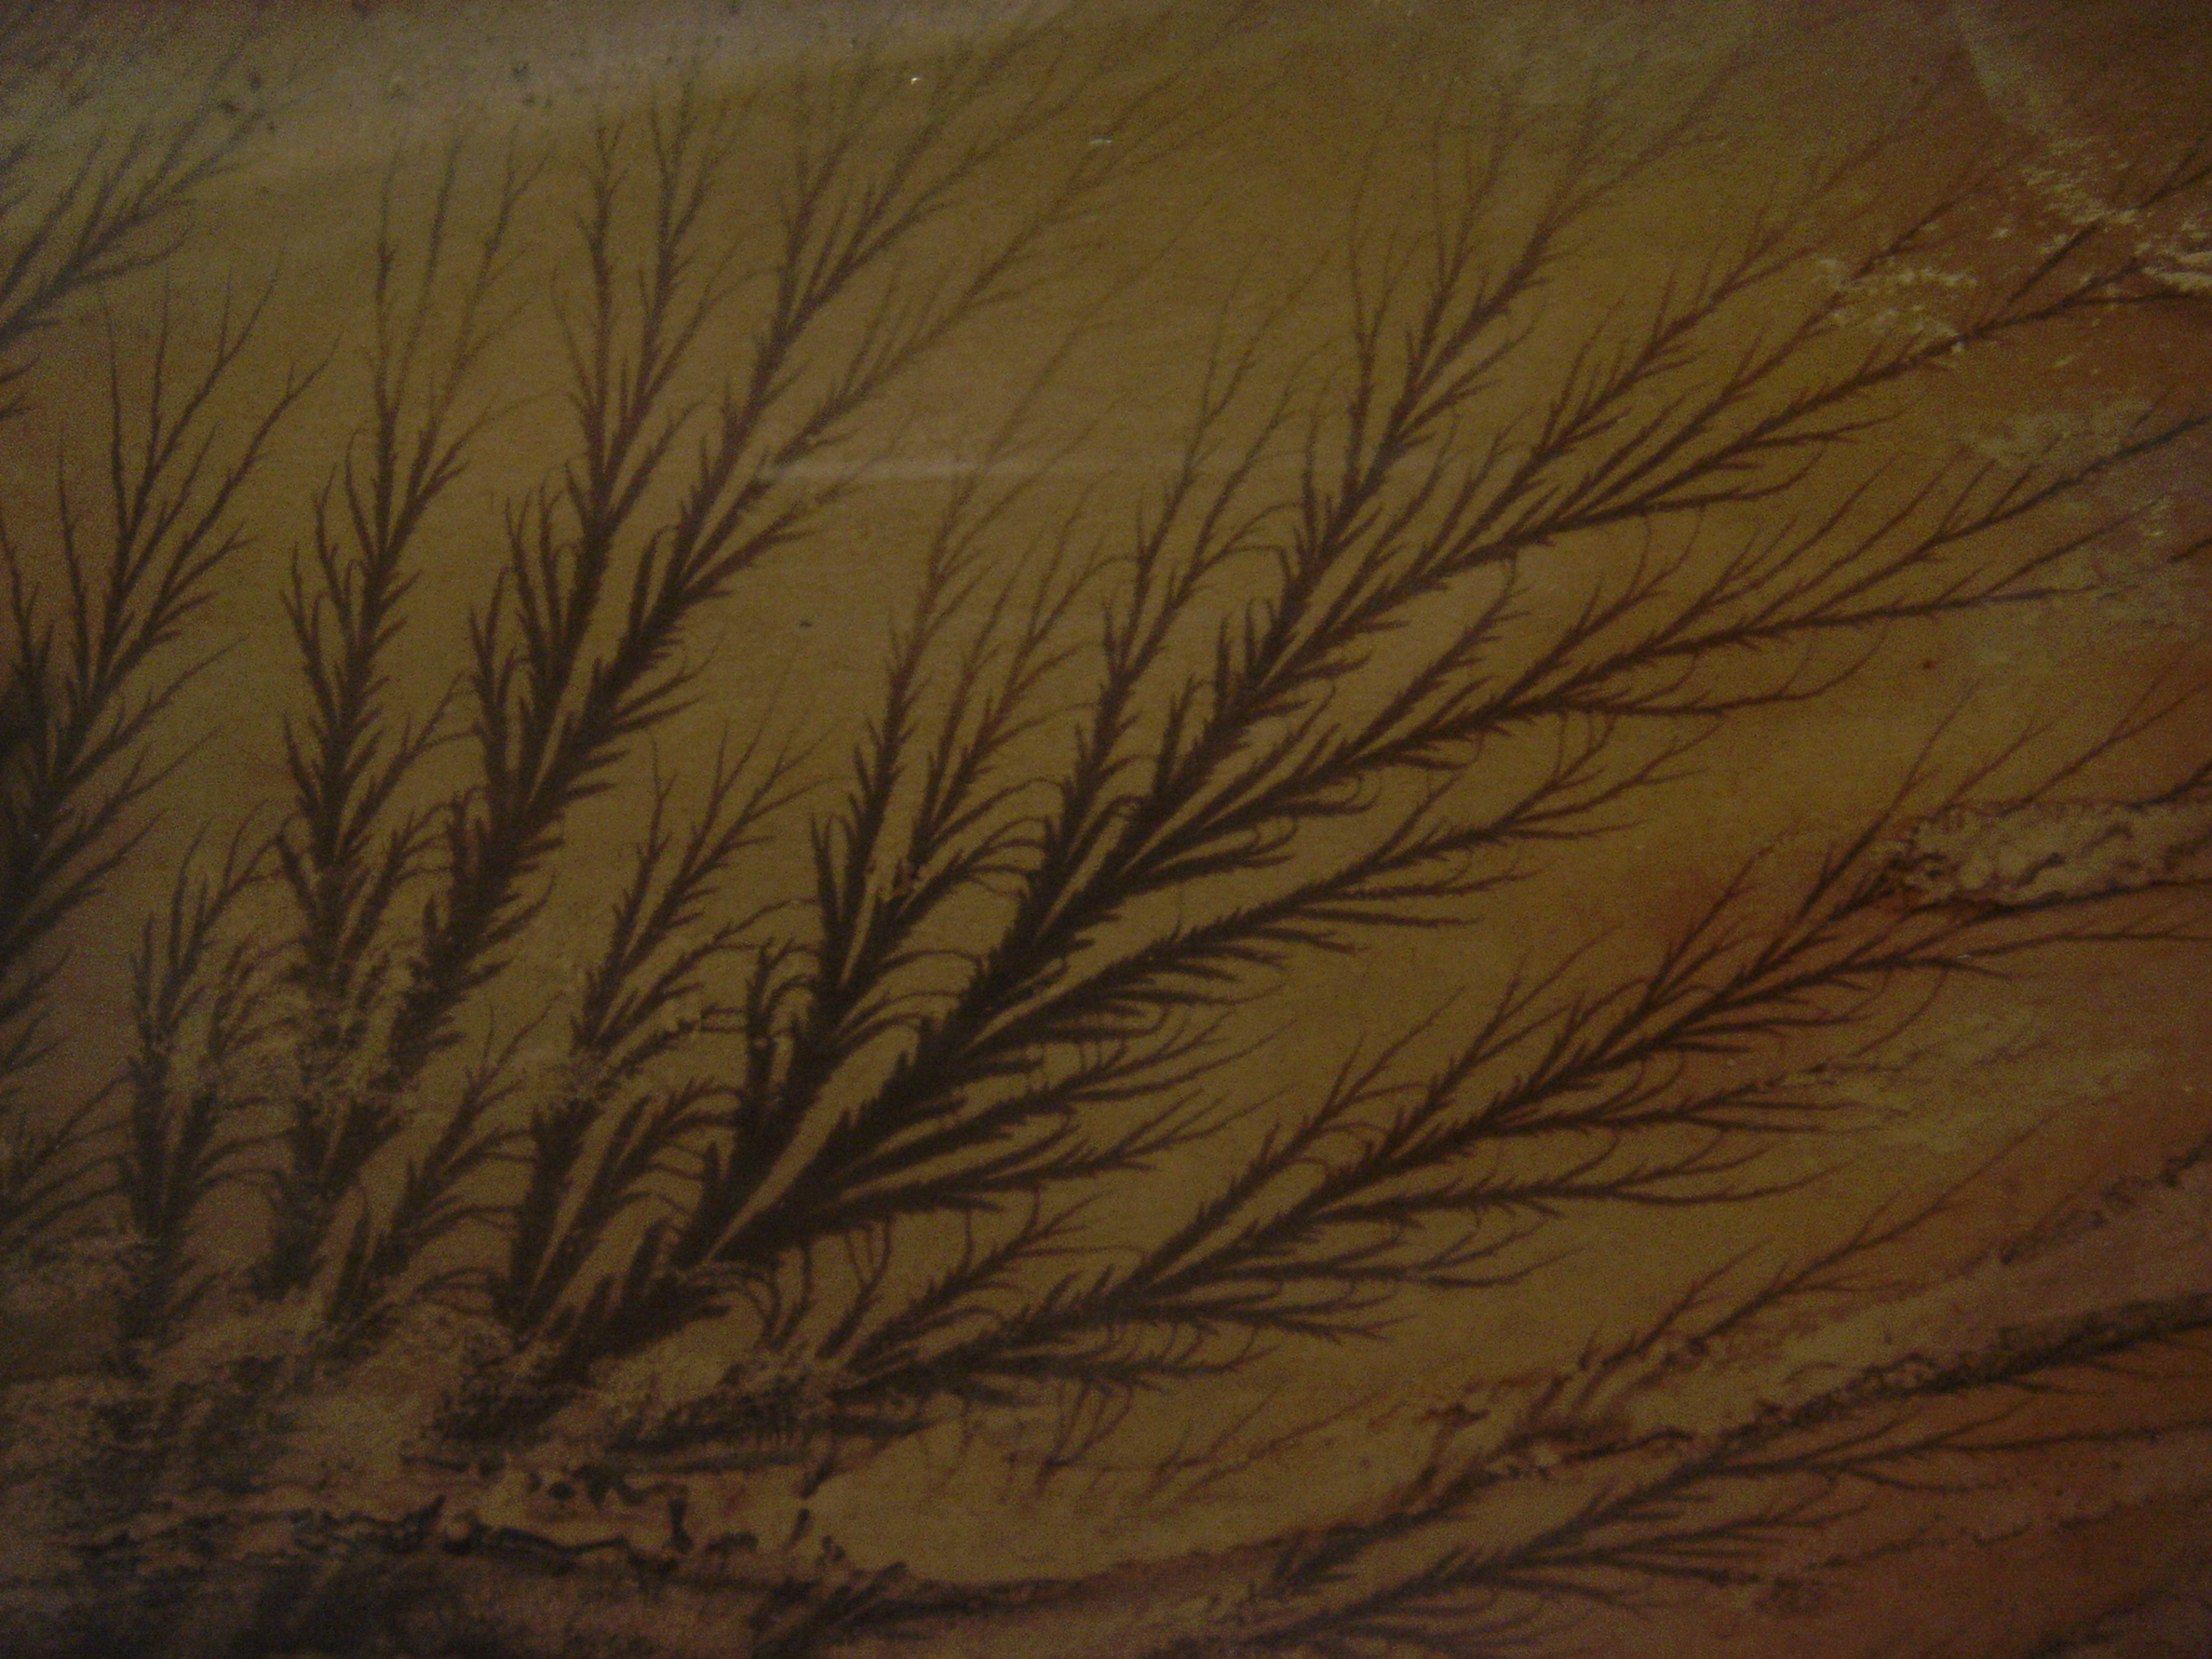

Discharge showing original contents

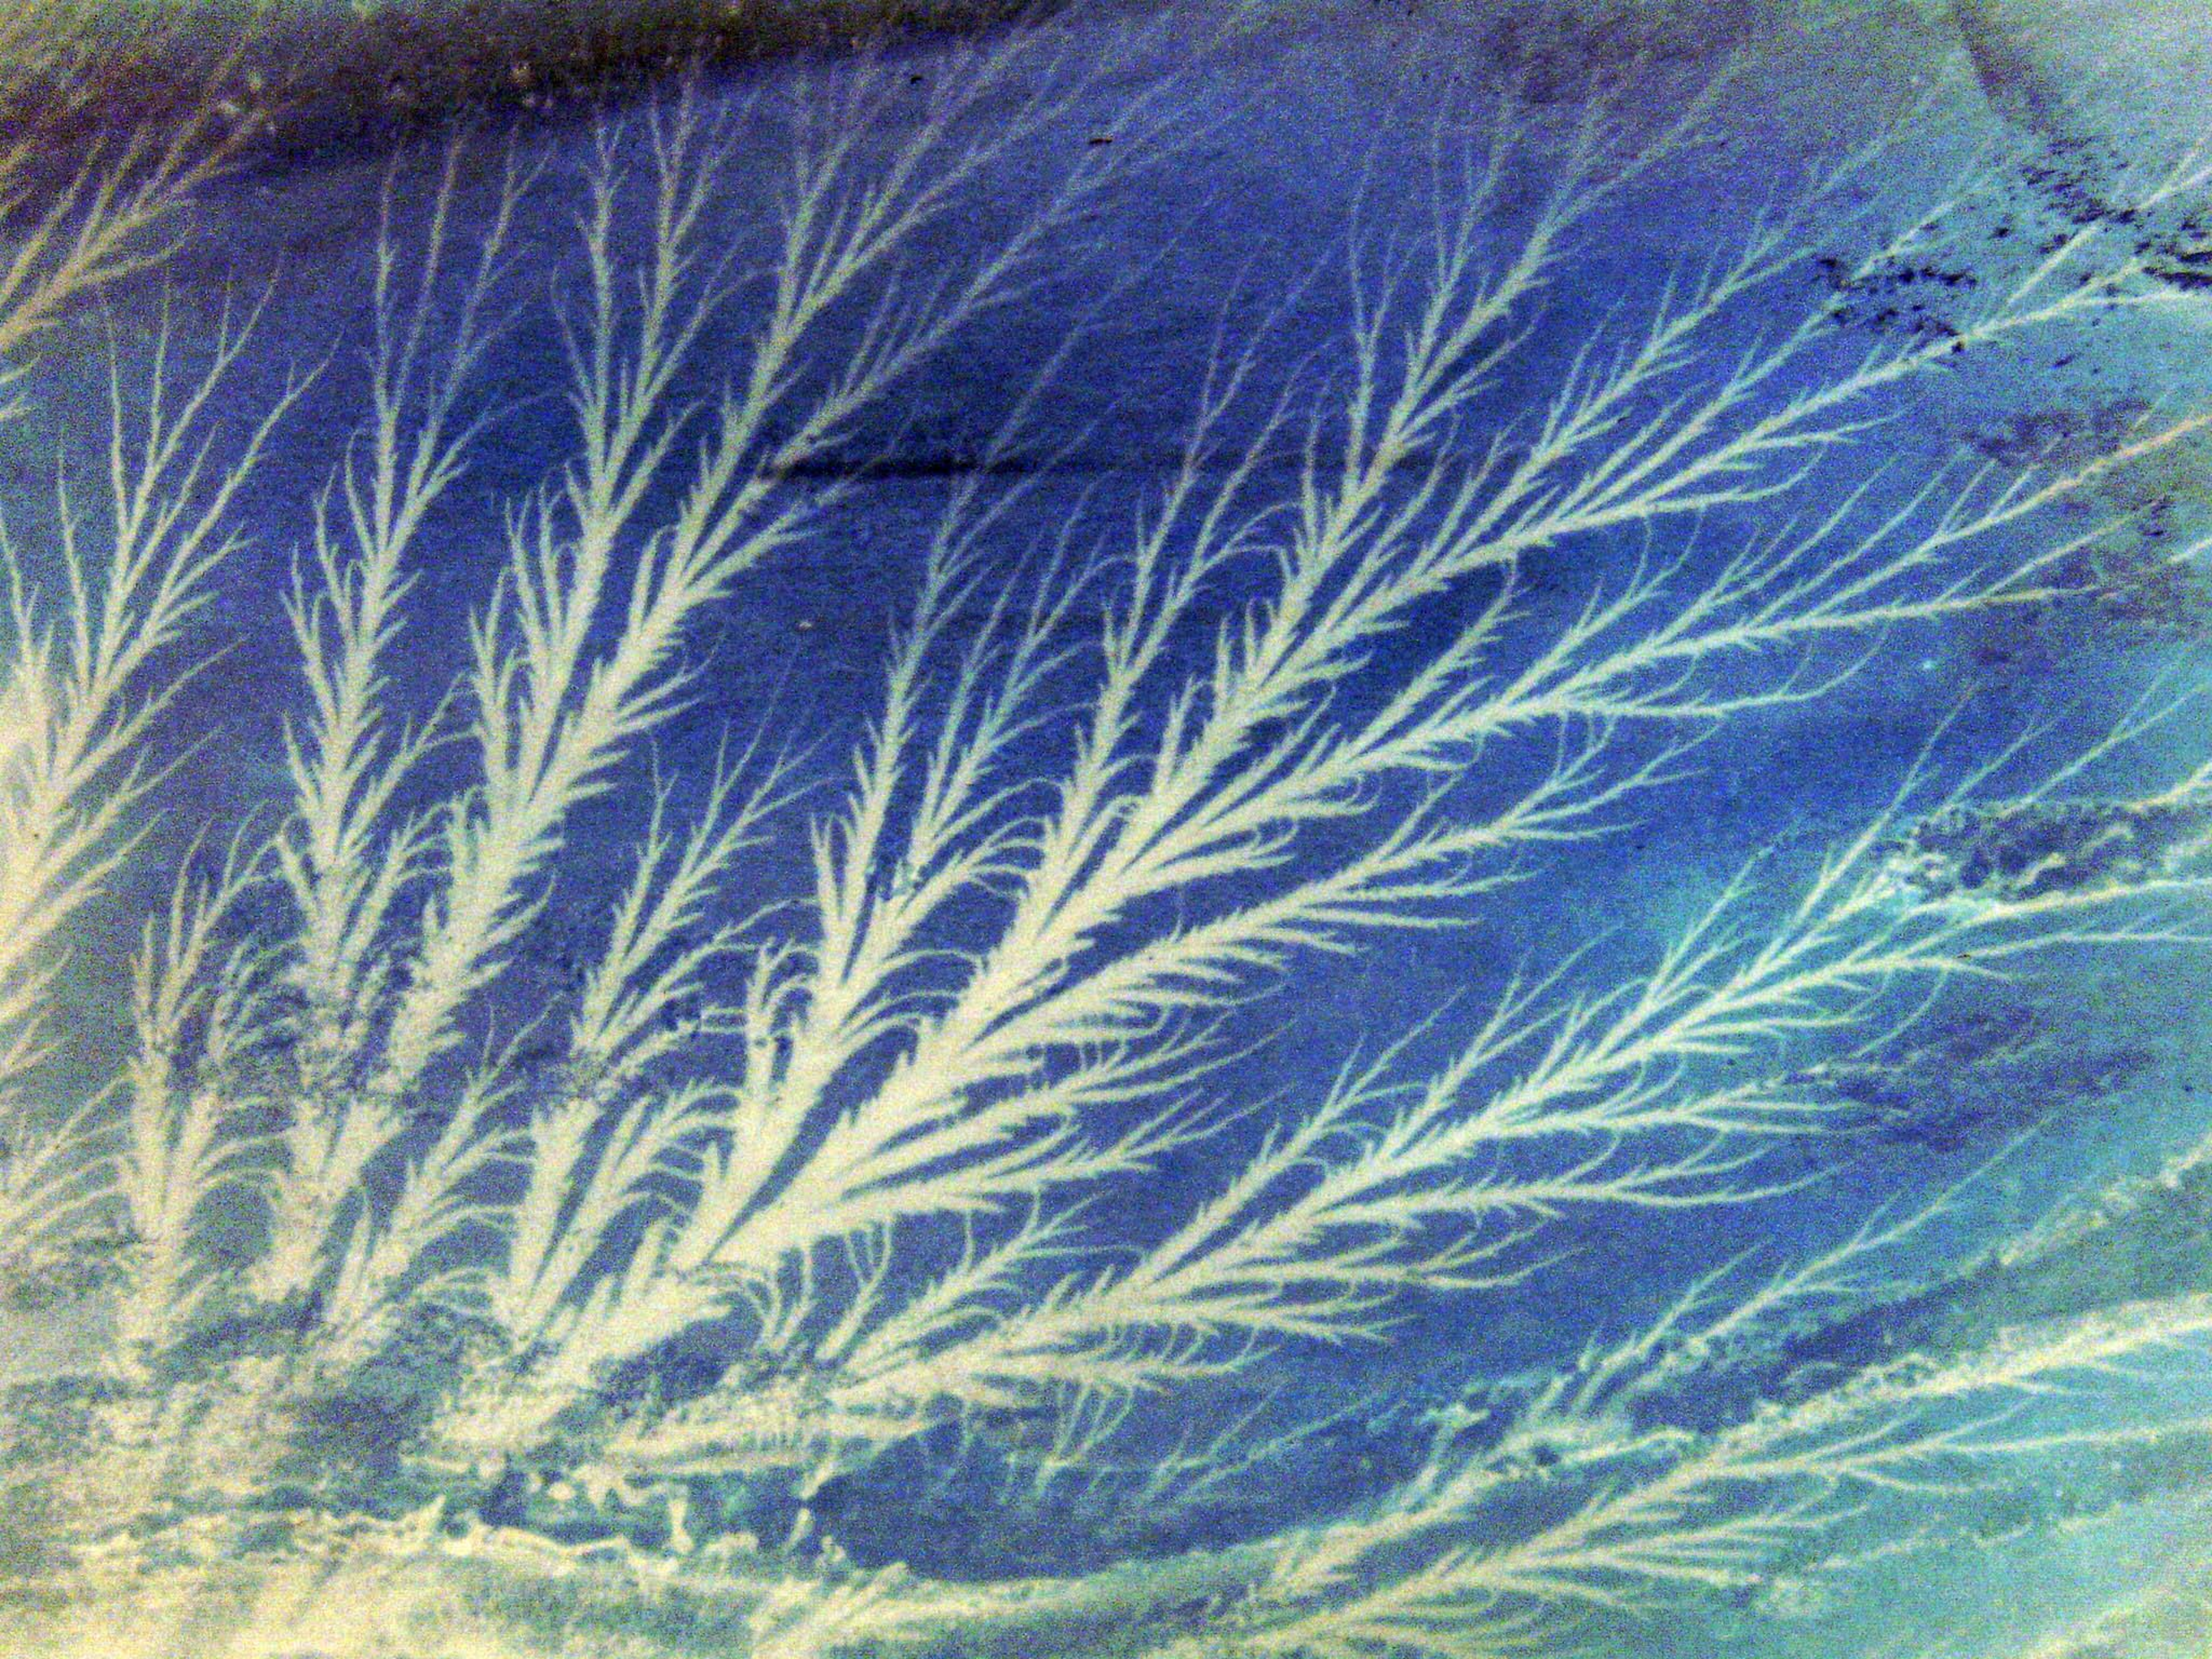

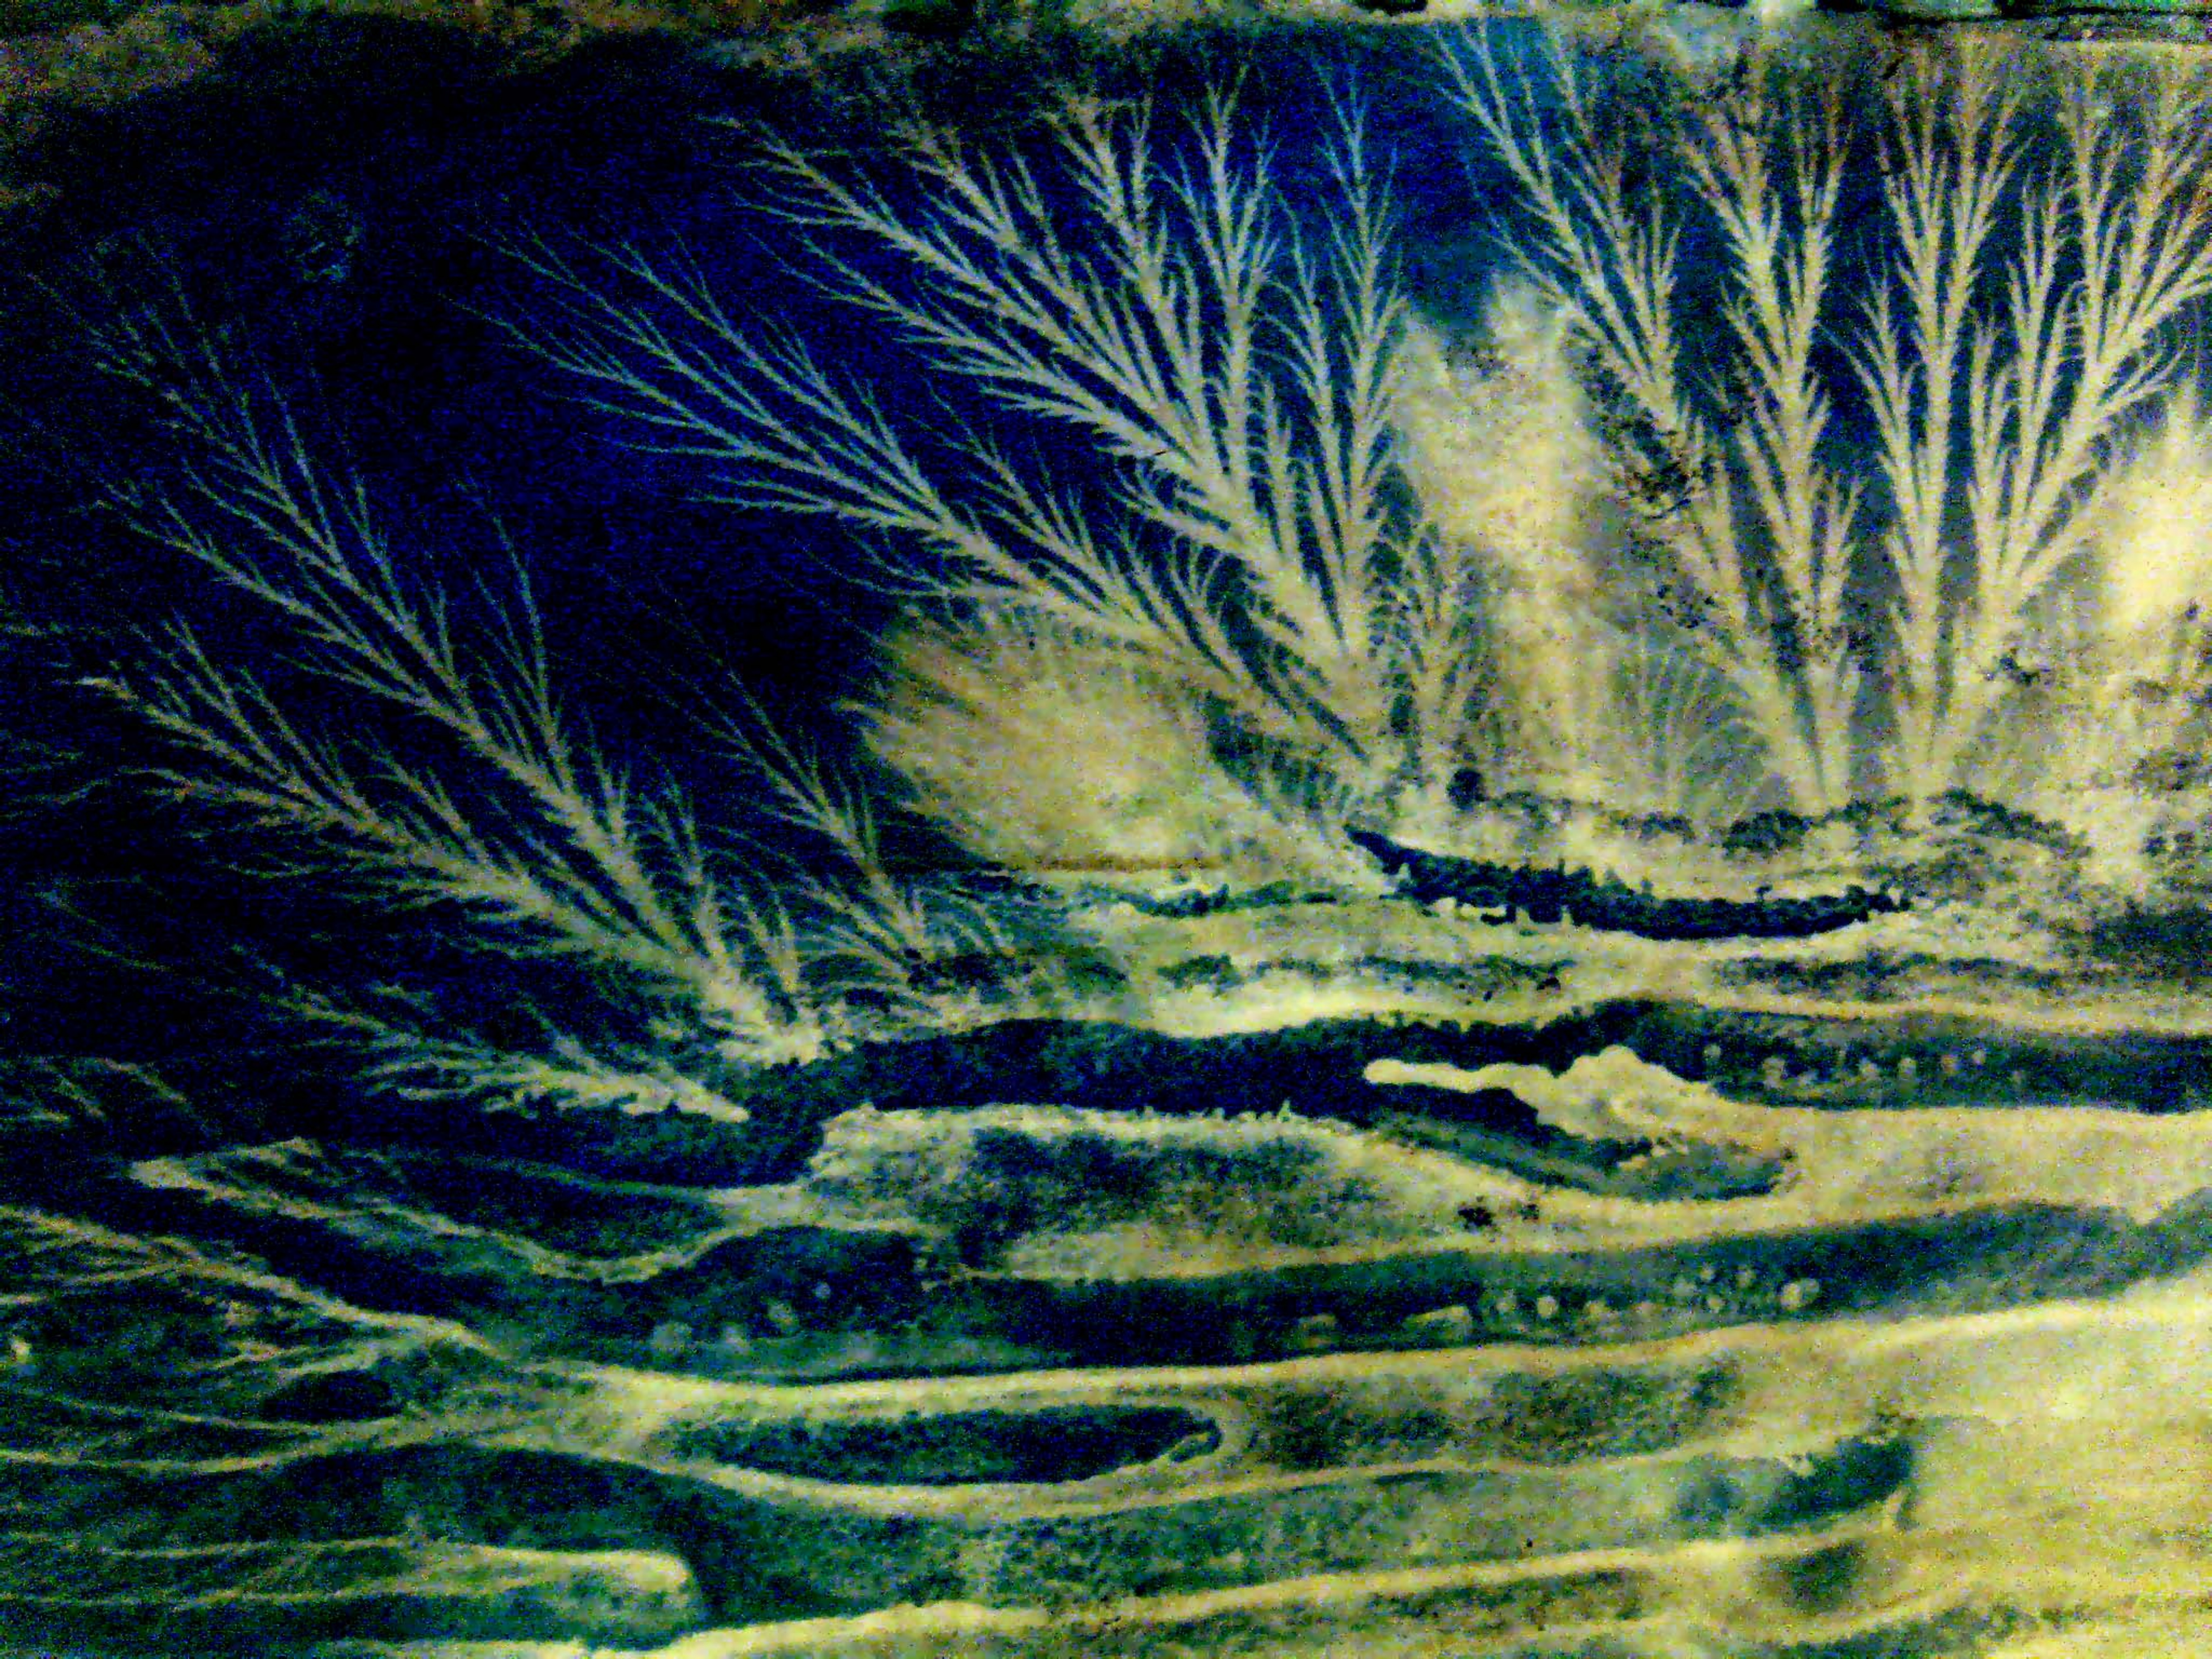

*Filiform Discharge  
on end of Molt*

Handwritten text, likely a date or reference, including the words "January" and "December".

Filiform Discharge  
on end of plate

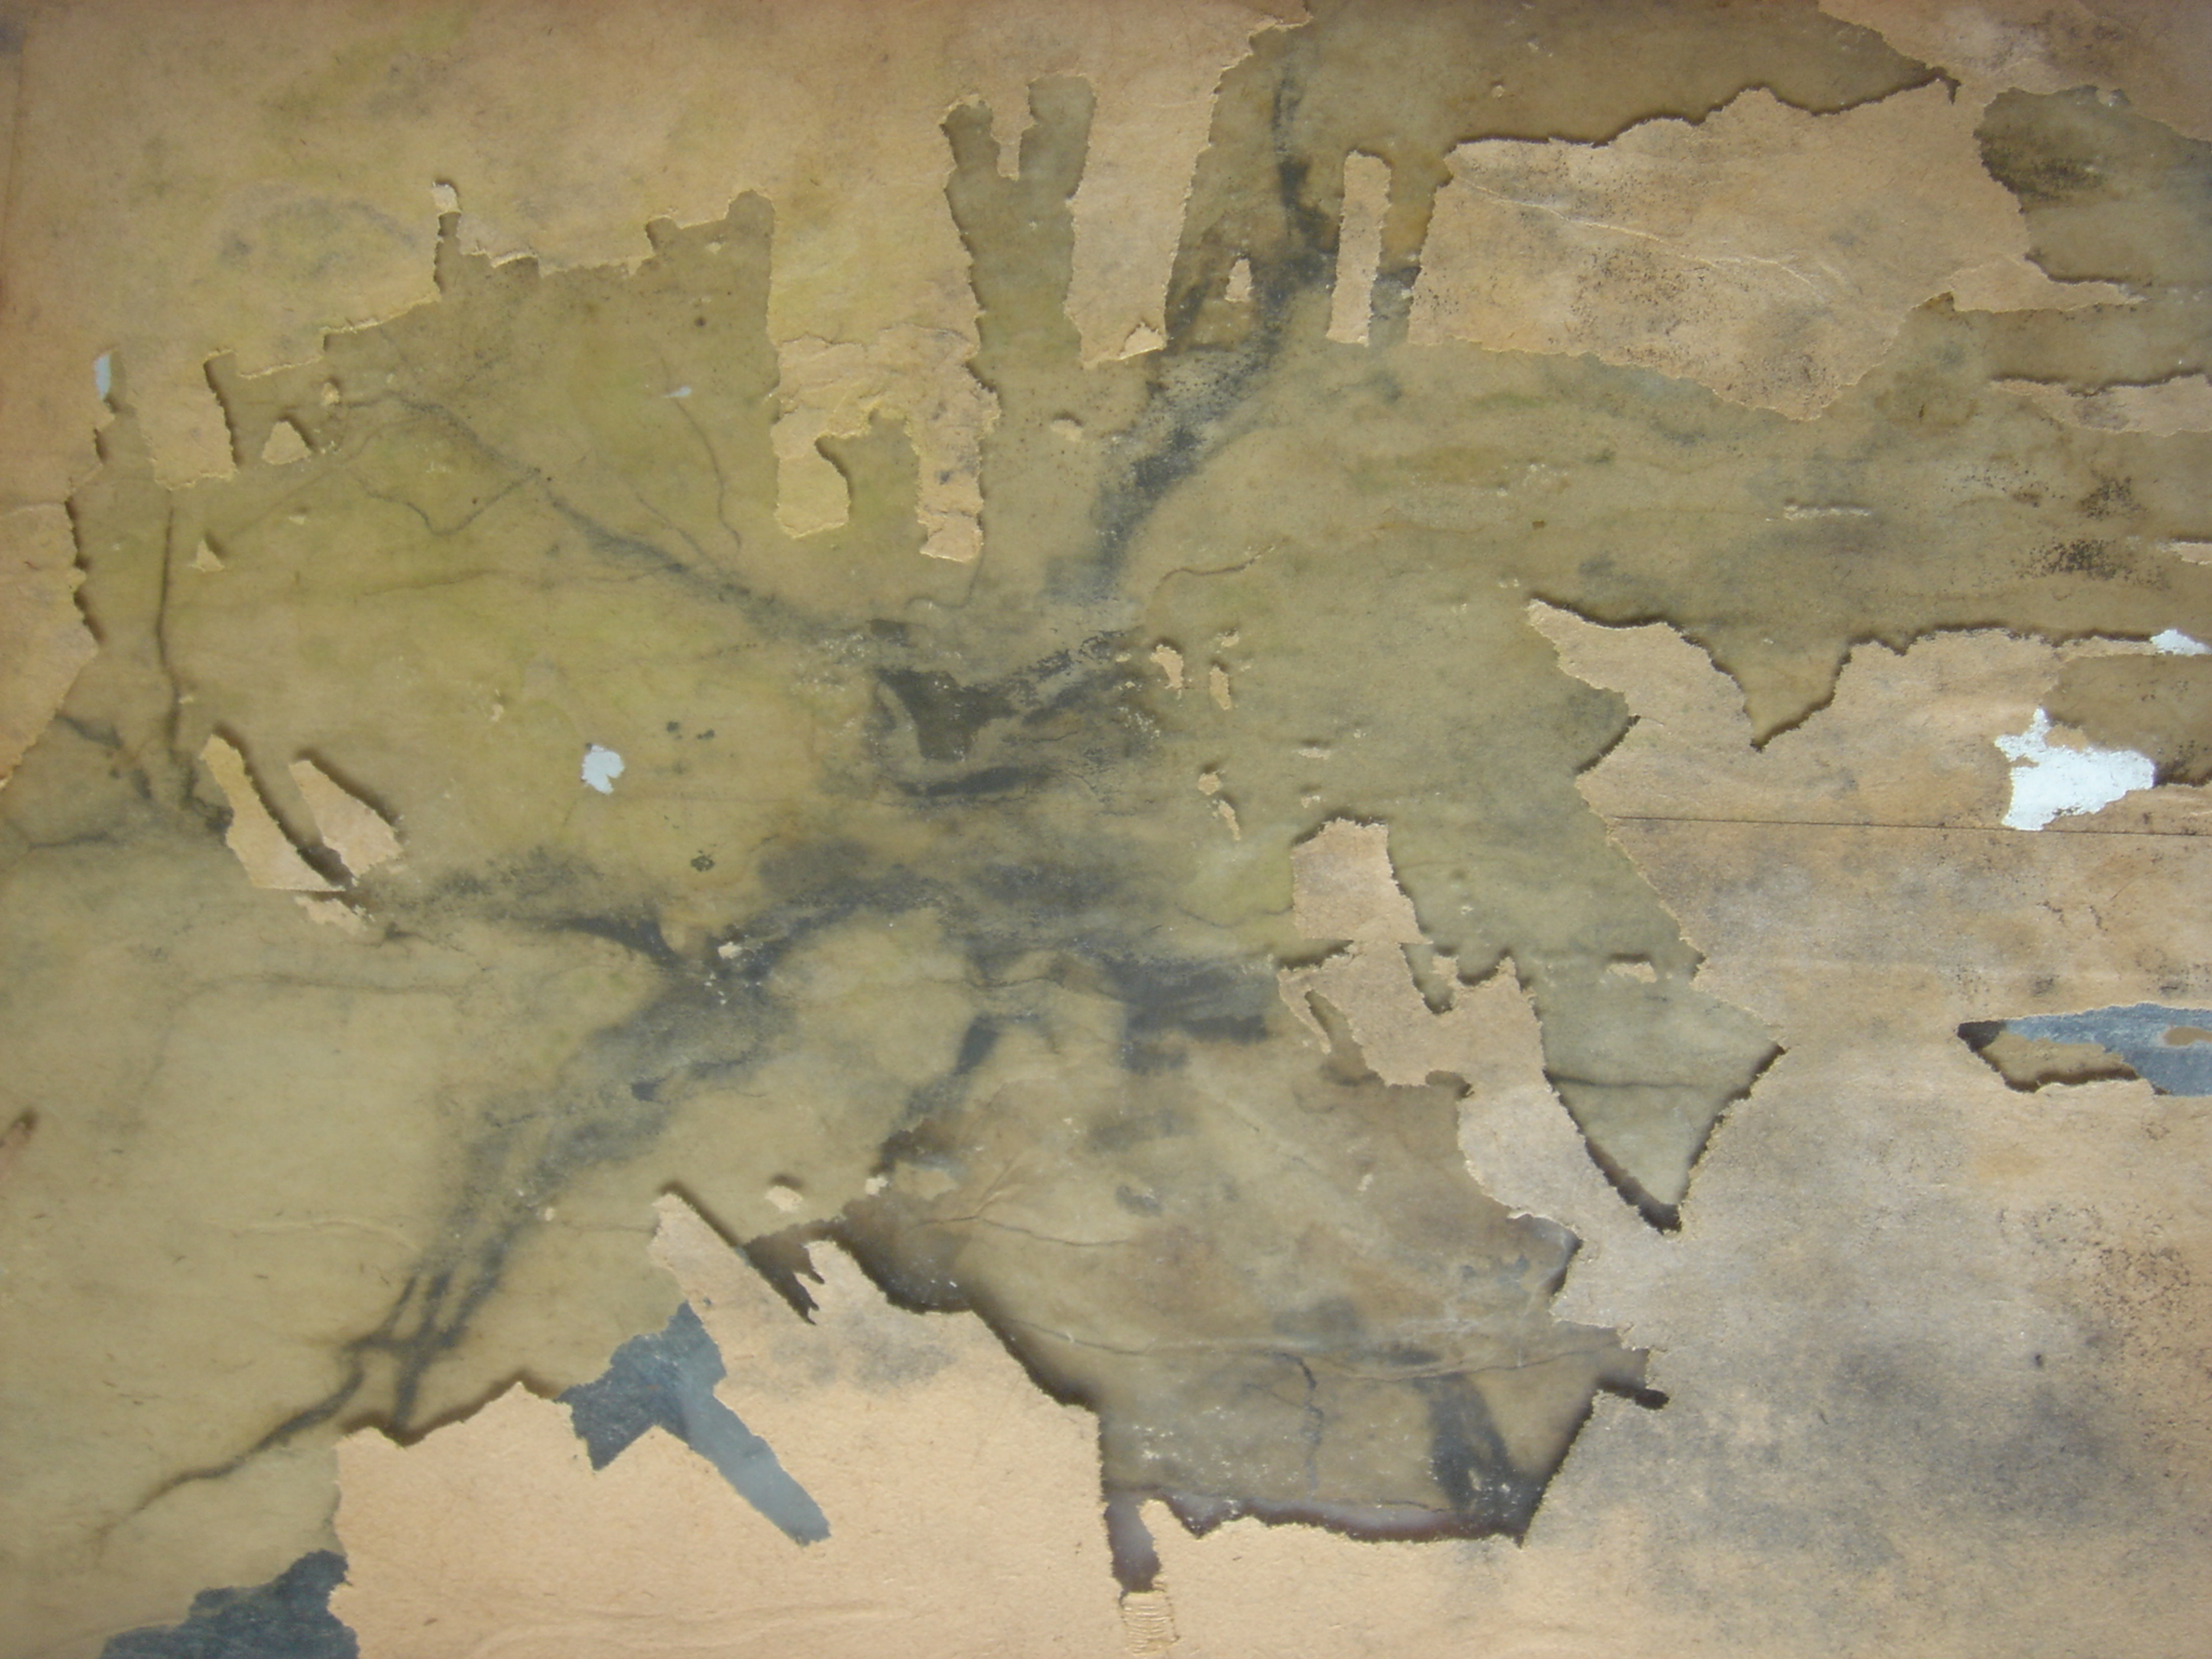

Striated

*Handwritten text, possibly a title or header, partially obscured by a tear in the paper.*

*Handwritten text, possibly a list or description, partially obscured by a tear in the paper.*

Refractive index of conductor Section  
1/8 in Glass plate - 18 x 22 in  
on one side of the plate with negative  
charge on the other with an electric  
field of 15 in between the plates  
The resulting effect is  
the conductor  
is charged with negative  
charge
